

February 2023

Start the year right with good record-keeping practices

Sources: Steve Isaacs, extension agricultural economist

Record-keeping is not everyone's favorite activity, but with a little time, patience, and a commitment to get it done, your financial life will be more peaceful.

Record-keeping tasks don't have to be difficult. Think of it as a way to keep track of your operation that will help you make better long-term decisions. You can use a ledger book or a computer—whatever helps you maintain consistency. Software programs can help you make sense of your data.

Software has become more user-friendly over time, and while it may not make the record-keeping process fun, it could help you see the overall picture of your operation. Some programs track purchases and how you use each item on a particular enterprise or field. You'll be able to keep track of repair and maintenance records for specific farm equipment and produce balance sheets, income statements and cash flow budgets.

For many livestock operations, a good time to start keeping records is when your veterinarian comes to check your animals. Vets usually charge per head, so that data can help you develop a list of animals that need attention. You can use the same data to develop health histories of your animals, which will lead to more informed exams and diagnoses in the future.

Make record-keeping a team effort for your family. Sit down and work on the records and budget together. Perhaps one person can read the information while another person types it into the software program or writes it in the ledger book. You won't become overwhelmed if you do a little bit each day and don't save it all up for the end of the year. Year-end procedures also can feel more satisfying if you've done the work throughout the year. You can generate year-end reports with a few simple clicks and not have to sort through stacks of bills lying around the home or office.

The University of Kentucky College of Agriculture, Food and Environment's Department of Agricultural Economics has several tools online that could help with budgeting and decision-making. Visit <https://agecon.ca.uky.edu/budgets> to see what is available.

For more information about record-keeping and a variety of other farm management topics, contact the Breathitt County Cooperative Extension Service at (606)666-8812.

Educational programs of the Kentucky Cooperative Extension Service serve all people regardless of economic or social status and will not discriminate on the basis of race, color, ethnic origin, national origin, creed, religion, political belief, sex, sexual orientation, gender identity, gender expression, pregnancy, marital status, genetic information, age, veteran status, or physical or mental disability.

Compost Distribution

MUST SIGN UP ON MONDAY FEBRUARY 6TH BY CALLING

666-8812 OR 666-8813

PICK-UP WILL BE AT THE UK ROBINSON CENTER

ON TUESDAY FEBRUARY 7TH

USDA:

The 90-120-Day Rule

You may not apply raw, uncomposted livestock manure to food crops unless it is:

1. Incorporated into the soil a minimum of 120 days prior to harvest when the edible portion of the crop has soil contact; OR
2. Incorporated into the soil a minimum of 90 days prior to harvest of all other food crops.

Benefits of Compost:

- *easier to work and create a better medium for plant growth
- * helps control weeds, conserve water, and protect soil from erosion

The best time to apply compost mulches is in early summer, after plants are established and the soil has warmed

Mix 1 to 2 inches of compost into your soil before you plant a vegetable garden, lawn, flower bed, or cover crop.

This program is sponsored by the Breathitt County Extension Office, Grow Appalachia, and UK Robinson Center.

THE BREATHITT COUNTY EXTENSION OFFICE IS NOW TAKING ORDERS FOR

Rootstock

Apple varieties include:

- **M.7** (3/16" or 1/4")- is a semi-dwarfing tree. It is resistant to fireblight, powdery mildew, and root collar rot.
- **M.111** (3/16" or 1/4")- A vigorous, well anchored, drought tolerant rootstock. It creates a large semi dwarf tree 15-17 ft. if unpruned. Widely adapted to light or heavy soils. Resistant to collar rot.
- **G202** (1/4")- a semi-dwarfing rootstock. It is fire blight and phytophthora resistant, but also has good resistance to wooly apple aphid, a rootstock pest.
- **G41** (3/16" or 1/4")- A full dwarf. It is highly resistant to fire blight and phytophthora and in initial tests it appears to be tolerant of replant disease. It produces trees similar in size to the M.9, but has higher yield efficiency and produces few root suckers.
- **Bud 9** (3/16")- is a dwarfing rootstock that dwarfs trees to 30-40 percent the size of a standard tree. It is valued for its early precocity, winter hardiness, and resistance to crown rot and fireblight.

- Pear** - Semi-dwarfing rootstock for fruiting pear. Very promising for higher density plantings. Resistant to fire blight.

All rootstock is \$2.00 each

FOOD BOX DISTRIBUTION

**FEBRUARY 15, 2023
PICK UP DAY**

**MUST SIGN UP ON MONDAY FEBRUARY 13TH BY CALLING
666-8812 OR 666-8813**

PICK-UP WILL BE AT THE UK ROBINSON WOOD CENTER

This program is sponsored by the Breathitt County Extension Office and God's Pantry.

Cajun Seasoned Fish with Rice

- 1 tablespoon paprika
- 1 tablespoon dried oregano
- 1 tablespoon garlic powder
- 1 teaspoon ground black pepper
- 1 teaspoon salt
- 1 tablespoon butter
- 1 package (10 ounces) frozen vegetable blend with onions, celery, peppers, and parsley
- 3 cups cooked brown rice
- Nonstick cooking spray
- 1 1/2 pounds thawed fish fillets, any type
- 1 lime (optional)

1. Wash hands with warm water and soap, scrubbing for at least 20 seconds.
2. Combine paprika, oregano, garlic powder, pepper, and salt in a small bowl. Set aside.
3. Melt butter in a medium saucepan.
4. Add frozen vegetable blend.
5. Cook and stir over medium heat for 5 to 8 minutes or until vegetables are tender.
6. Add cooked rice and 1 teaspoon of prepared seasoning mix. Cook and stir until rice is heated through, about 3 to 5 minutes.
7. Reduce heat to very low. Cover rice mixture and keep warm while preparing fish.
8. Spray fish fillets on all sides with cooking spray and coat with seasoning mix. Remember to wash your hands after handling raw fish.
9. Place a large cast iron skillet or other heavy, nonstick skillet on the stovetop over medium high heat. Let the pan preheat until it's very hot but not smoking.
10. Place fish fillets in a single layer in the pan. The pan will smoke a little.
11. Cook fish over medium-high heat for 3 minutes. Use a spatula to carefully turn the fish over. The seasoning mixture will make a dark brown crust on the fish.
12. Cook the fish on the other side for 3 more minutes, or until it is solid white and flakes easily with a fork, or registers at least 145 degrees F when tested in the thickest part.
13. Divide fish into six portions and serve each piece over 1/2 cup of cooked rice.
14. Optional: Sprinkle fish with juice from one lime.
15. Refrigerate leftovers within 2 hours.

Variations: Add 1/4 teaspoon cayenne pepper or chili powder for a spicier mix.
Makes 6 servings
Serving size: 1 fish fillet and 1/2 cup rice
Cost per recipe: \$11.44
Cost per serving: \$1.91
